## **DETAILED ACTION**

### *APPLICANTS' RESPONSE*

Applicants' amendments and arguments in the response filed 15 June 2004 have been fully considered and are deemed to be persuasive. Claims 30-55 have been cancelled.

### *EXAMINER COMMENT*

Regarding the language "satisfying amino acid" (i.e. claim 1) the specification (page 17, lines 13-26) provides the following:

"the term "satisfying amino acid" is intended to mean an amino acid having a mass that matches a mass measurement of an amino acid or that matches the difference in mass of two mass signals corresponding to a polypeptide and a fragment thereof that differs in size by a single amino acid. Similarly, satisfying amino acids refer to two or more amino acids having a combined mass that matches a mass measurement of two mass signals corresponding to a polypeptide and a fragment thereof. Therefore, a satisfying amino acid or amino acids have a mass that fulfills an obtained or empirically determined mass of an amino acid or polypeptide molecule."

### *REASONS FOR ALLOWANCE*

The following is an Examiner's statement of reasons for allowance:

The filing of the amendments to claims have overcome all grounds of rejection in the office action, mailed 15 December 2003, and no other grounds for rejection are present. Therefore, claims 1-29 are deemed allowable. No pending United States applications have been identified with claims directed to the same invention as claimed herein.

Any comments considered necessary by Applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
